AREA OF FIELD CROPS, 1956

This report presents final figures on the area of field crops for harvest in 1956 reported in the 1956 Census of Agriculture. The enumerators were instructed to include all crops for harvest in 1956, whether planted at the date of the Census, June 1, or intended to be planted for harvest that year.

The term "farms reporting" indicates the number of farms that reported growing the various crops.

Definition of a Farm: For census purposes a farm is defined as a holding on which agricultural operations are carried out and which is:

- (1) three acres or more in size, or
- (2) from one to three acres in size, and with the agricultural production in 1955 valued at \$250 or more.

The holding may consist of a single tract of land or of a number of separate tracts held under the same or different tenures, and operated as a single unit.

In certain sections of the Province of Quebec, the land measure is the arpent and enumerators reported crop areas in this unit. The conversion to acres was made in the Dominion Bureau of Statistics, using the factor, 1,000 arpents equal 845 acres.

Symbols used:

- (-) means "nil"
- (--) means "less than one acre".

SUPERFICIE DES GRANDES CULTURES, 1956

Le présent rapport donne les chiffres définitifs de la superficie des grandes cultures devant être récoltées en 1956, telle qu'elle a été relevée lors du recensement de l'agriculture de 1956. Les agents recenseurs devaient consigner toutes les cultures destinées à la récolte de 1956, déjà en terre à la date du recensement (1^{er} juin) ou devant être semées plus tard en vue de cette récolte.

L'expression "fermes qui font rapport" désigne le nombre des fermes qui ont déclaré pratiquer les diverses cultures.

Définition d'une ferme: Pour les besoins du recensement, une ferme est un lopin de terre consacré à l'exploitation agricole et:

- 1° ayant une superficie de trois acres ou plus, ou
- 2° ayant une superficie de une à trois acres, et dont la production agricole en 1955 a donné \$250 ou plus.

La terre peut se composer d'un seul ou de plusieurs lopins distincts détenus selon le même mode d'occupation ou selon des modes différents, mais exploités comme une ferme unique.

Dans certaines parties de la province de Québec, la mesure agraire est l'arpent et les agents recenseurs l'ont employée lorsqu'ils ont inscrit la superficie des cultures. La conversion en acres a été faite au Bureau fédéral de la statistique, qui a employé le facteur de 1,000 arpents pour 845 acres.

Signes conventionnels utilisés:

- (-) signifie "néant"
- (--) signifie "moins d'une acre".
